

wherein the finger restriction portion is defined by two facing portions of a fold formed in the formed-with the opposite face that are is folded to have two portions of the opposite face facing each other, at least a part of each of the two portions being bonded to each other at least at a respective portion thereof of the cavity near the second edge of the interlabial pad another end of the cavity in the longitudinal direction,

wherein the mini-sheet covers a part of the opposite face that includes the another end of the cavity at which the two portions of the opposite face are bonded to each other, and

wherein a cross-sectional area of the cavity is gradually narrowed along the longitudinal in a direction of the interlabial pad in a direction proceeding from the first edge toward the second edge, of the another end of the cavity such that the fingertip [[finger]] of the wearer that is inserted can be stopped,

wherein the fold formed in the opposite face forms a protruding portion protruding from the face adapted to face the body, a first planar portion at one side of the protruding portion and a second planar portion at another side of the protruding portion being substantially parallel to one another, and

wherein the protruding portion extends in the longitudinal direction from the first edge to the second edge of the interlabial pad.

Claims 2-5 (canceled).

Claim 6 (previously presented): The interlabial pad according to claim 1, wherein an interval dimension between the opening for finger insertion and said finger restriction portion is 10% to 80% of a length in the longitudinal direction of the opposite face.

Claim 7 (currently amended): The interlabial pad according to claim 1, ~~further comprising a front end,~~

wherein the cavity opening proceeds from a front edge of the mini-sheet that is disposed at a location that is 40% from the first edge along the longitudinal direction ~~front end~~ of the interlabial pad, and

wherein said finger restriction portion is disposed at a location that is 90% from the first edge along the longitudinal direction ~~front end~~ of the interlabial pad.

Claim 8 (withdrawn): The interlabial pad of claim 1, wherein said finger insertion restriction portion comprises a fingertip exit for protruding the nail tip of the inserted finger.

Claim 9 (previously presented): The interlabial pad according to claim 1, wherein said finger restriction portion is disposed at a predetermined distance from one longitudinal end towards the center of the interlabial pad on the opposite face.

Claim 10 (withdrawn): The interlabial pad of claim 1, wherein said finger insertion cavity comprises a finger insertion compulsory portion for tilting compulsorily the finger insertion direction toward said finger insertion restriction portion on the opposite side face to body.

Claim 11 (withdrawn): The interlabial pad of claim 10, wherein said finger insertion compulsory portion is formed by a shape of folding said mini sheet piece into said finger insertion cavity.

Claim 12 (previously presented): The interlabial pad according to claim 1, wherein the interlabial pad is used together with a sanitary napkin.

Claim 13 (previously presented): The interlabial pad according to claim 1, wherein said interlabial pad is for incontinence.

Claim 14 (previously presented): The interlabial pad according to claim 1, wherein said interlabial pad is for absorbing vaginal discharge.

Claim 15 (withdrawn): A wrapping body comprising an interlabial pad; and
a wrapping container containing said interlabial pad, wherein said interlabial pad is contained and folded such that said finger insertion opening opens when said wrapping container is unwrapped.

Claim 16 (withdrawn): The wrapping body of claim 15, wherein said wrapping container comprises a mark indicating an unwrapping direction which is the same direction as an insertion direction of the finger into said finger insertion opening.

Claim 17 (withdrawn): The wrapping body of claim 16, wherein said mini sheet piece in said interlabial pad is folded outwardly in a shape swelling toward the body side.

Claim 18 (previously presented): The interlabial pad according to claim 1, wherein a length of the mini sheet piece is between 50% and 80% of a longitudinal length of the interlabial pad.

Claim 19 (withdrawn): The interlabial pad according to claim 1, wherein the interlabial pad is formed with adhesion on a part of the face adapted to face a body to be in contact with a genital area of the body.

Claim 20 (withdrawn): The interlabial pad according to claim 1, wherein the mini-sheet is formed as a water permeable sheet.

Claim 21 (currently amended): The interlabial pad according to claim 1, wherein the mini-sheet is attached so as to be in direct contact with the opposite face portions covered thereby-except for a ~~portion of~~ the cavity formed therebetween, ~~[[and]]~~ where the mini-sheet is arranged ~~at a side of the cavity, being~~ opposite to the cavity opening.

Claim 22 (withdrawn): The interlabial pad according to claim 1, wherein the mini-sheet is bonded to the opposite face at the lateral sides and at the side of the another end of the cavity.

Claim 23 (withdrawn - currently amended): The interlabial pad according to claim 1 ~~[[22]]~~, further comprising:

a first portion for bonding the opposite face to the face adapted to face the body; and
a second portion for bonding the mini-sheet to the opposite face,

wherein the first portion and the second portion are offset.

Claim 24 (new): The interlabial pad according to claim 7, wherein the interlabial pad has a longitudinal length between 50 mm and 160 mm.

Claim 25 (new): The interlabial pad according to claim 24, wherein the interlabial pad has a longitudinal length between 80 mm and 130 mm.
